Indish

Free your hands, you can cook anything with "Indish" AR smart glasses applications. How about make a coins from your recipe.

透過智能眼鏡實現虛擬實境，您可以一邊看着教學一邊煮食。您更可以出售您的食譜，不用雙手便能輕鬆賺錢。

The screenshot displays the Indish app interface. It features three recipe cards: 'Tomato Yummy Spaghetti' by Peter Chan, 'Nice Salmon Meal with Great Taste Lemon' by Albert Wong, and a 'Step 1 / 6' instruction: 'Chop something. Then chop something again. Chop chop chop. After that, find something to keep chopping. To chop everything into many pieces.' A semi-transparent AR smart glasses overlay is shown in the center, with a camera lens and a display area.

Product
Smart Glasses App (MAD GAZE)

Client
MADMAD GROUP

Description
"Indish" is a smart glasses application to let different types of cooking enthusiasts to create their own recipes and share on a cooperative platform.

To create a new recipe, user can record each steps by taking photos, videos and enter the description (using speech-to-text function) by the smart glasses when they making their own cuisine. After recorded all the steps, user can built a 360 degrees view for the dish by taking pictures in each angle, the app will automatically combine all the images as a animation. It let users have a better understanding on how the dish looks and attract more attention on the platform.

The platform is using the points system. User can get 1 point with every single creation they made. Share their recipes to the public also can earning the points. If user did not have enough points, he/she can buy the points by cash to get other users' recipes. The app also offer a private option to exchange their private recipes to other users.

To cook, the smart glasses are acting on behalf of real-time recipes through a "step-by-step" process to guide the user to finish the cuisine. During cooking, the screen will show each steps on the screen. It is best for the users to free up both of his/her hands to focus on the cooking process.
